What is the Theory of Knowledge Online Research Programme?

The Theory of Knowledge Online Research Programme offers 1:1 tutoring and bespoke guidance with a highly-skilled Oxford or Cambridge academic, culminating in a full-length academic research paper befitting the Theory of Knowledge format. **It is the only comprehensive programme that not only supports you with your IB deliverable but also focuses on nurturing, related essential skills for your future. You will exclusively be supported by a tutor and mentor.**

This personalised programme will equip you with the skills to undertake your Theory of Knowledge with confidence, harnessing the expertise from accomplished Oxford and Cambridge academics boasting extensive experience of the International Baccalaureate curriculum and Theory of Knowledge expertise. Through careful guidance and support throughout the programme from your tutor, your programme will culminate in the completion of a 4,000 word essay designed to provide you with the highest chance of success.

You will also receive a tailored evaluation report conveying encouraging, personalised feedback to further your subject interest and develop your skills and knowledge.

Under the tutelage of our PhD Oxbridge tutors, you can devise and develop your research question, explore the topic in rich detail, propose innovative ideas and construct a structured viewpoint, all within a study format that works for your goals and study style. Depending on what you choose, your mentor will offer study tips, provide study plan support and practical advice on time-management.

Our three delivery modes make the programme unique and customisable to suit your learning goals over 1 day, 2 weeks or 10 weeks, starting on a date of your choice.

Why Choose the Theory of Knowledge Online Research Programme?

Our course is designed to give students the tools they need to improve their study habits, increase their focus, and achieve their academic goals, while also equipping them with the skills to approach their Theory of Knowledge with confidence.

Our course is delivered entirely online, making it easy and convenient for students to complete at their own pace and schedule.

The course is year-round, designed to cater for your respective Theory of Knowledge deadline.

Strong Alignment with TOK Requirements

Our expert tutors have extensive experience of the International Baccalaureate curriculum and Theory of Knowledge expertise, helping you to meet all aspects of the Theory of Knowledge Criteria with confidence.

International Baccalaureate Theory of Knowledge Criteria:	Immerse Education: Theory of Knowledge Online Research Programme	How?
<p>Reflect critically on diverse ways of knowing and on areas of knowledge</p>	<p>✓</p>	<p>With the guidance of an expert Oxford or Cambridge tutor, participants explore the vast scope of the field of knowledge, learn how to evaluate different sources of information and gain the skills needed to critically evaluate conflicting pieces of information.</p>
<p>Consider the role and nature of knowledge in their own culture, in the cultures of others and in the wider world.</p>	<p>✓</p>	<p>The role of knowledge and its meaning within each individual participant's life and culture is explored in rich detail, diving deep into its place within their lives and in respect to other countries, exploring how knowledge is viewed through different lenses. The expertise of our PhD tutors enables the participant to consider how knowledge is perceived across the globe and how this determines its role within respective societies.</p>

Strong Alignment with TOK Requirements

International Baccalaureate Theory of Knowledge Criteria:	Immerse Education: Theory of Knowledge Online Research Programme	How?
<p>Be aware of themselves as thinkers, encouraging them to become more acquainted with the complexity of knowledge.</p>	<p>✓</p>	<p>Through the deep, rich discussions of knowledge as a concept guided by their Oxbridge tutor, participants gain invaluable skills in developing their ability to think critically, argue respectfully, consider different viewpoints on the role of knowledge and pose thought-provoking questions on knowledge as a whole.</p>
<p>Developing an argument.</p>	<p>✓</p>	<p>In considering the nature and role of knowledge within society, participants can collaboratively explore their role as responsible citizens with their Oxbridge tutor. Participants engage in determining how they can comprehend and navigate an ever-advancing society experiencing accelerated change, exploring the ways in which they can exert positive change in the world.</p>

“Rosie has an amazing understanding of real-life examples, and in her between questions make sure they engage me. And in fact she really loves my opinion, and she is just amazing, the best teacher I could have. She has given me the best experience advice whether it be off or on topic. She has a way to make understanding topics, even crucial topics like the 2008 financial crisis became a topic on my tips. She was never limited to the course but always asked me about my day, and my personal experience, and the class always became a discussion room, which helped me open up.

Theory of Knowledge Online Research Programme: Our Approach

The Theory of Knowledge Online Research Programme is built on the same philosophy as all our programmes:

1. We connect great tutors and mentors with students

The Theory of Knowledge Online Research Programme is taught by PhD level tutors from either the Universities of Cambridge, Oxford, or from an Ivy League institution. Students develop a project under the guidance of their mentors and tutors which is evaluated and assessed.

2. Everything we do is grounded in academic excellence

We develop learners academic skills and critical thinking in the context of their Theory of Knowledge.

3. Our programmes are innovative and challenging

We aim to expand students' horizons, and to challenge them to be inquisitive and curious thinkers.

4. We offer growth and enrichment

Our courses are designed for high-achieving individuals looking to place themselves in the best possible position for their Theory of Knowledge.
